Full-Stack Web Developer

SUMMARY

Passionate **Full Stack Web Developer**, and **Ironhack Graduate**. Lifelong learner. I enjoy working in agile development teams and sharing knowledge with other developers.

Apprentice to several senior web developers in Miami. I regularly participate in local JavaScript and coding meetups, as well as hackathons. Took courses at [LambdaSchool](#) and [Codecademy](#). Passionate for programming and creating living applications. Completed [Ironhack](#) and learned to create beautiful web applications. I'm determined to continuously improve my practice by learning from colleagues, superiors, and taking additional professional development on personal time.

TECHNICAL SKILLS

MongoDB ♦ Express.js ♦ Angular 6 ♦ Node.js ♦ TypeScript ♦ AJAX ♦ JavaScript ♦ HTML/CSS ♦ Windows 8/10 GUI

PROJECTS

Space Dogfight - <https://ihlowkeyop.github.io/GameProject/>

This is a game that was made in 5 business days as my first project in Ironhack. It is a two player, one-on-one dogfight app where duels can be held. Health bars will appear at the top of the screen, and two spaceships will spawn facing each other. Each player can survive 3 shots from the other. Asteroids move around on the screen. Any collisions result in instant death.

Deadline: 1 week

Technologies used: JavaScript, HTML5, CSS, Canvas

PizzaBox - <https://pizzaboxironhack.herokuapp.com>

Inspired by the plight of pizza deliveries that fail, PizzaBox takes the pain out of finding someone to sell a “dead” pizza to. Functioning as an online market place, users can register as a restaurant to post pizzas for sale, or as a customer to see all available pizzas and purchase one. This app was made in one week.

Deadline: 1 week

Technologies used: JavaScript (Node.js, Express.js) MongoDB, Stripe API, HTML5, SCSS, Bootstrap 4 Material Kit

Tournamaker – <https://tournamaker.herokuapp.com>

From the World Cup to a high school e-sports competition, everybody enjoys a good tournament. Tournamaker is a modern way for everybody, not just large companies, to be able to make and join a tournament. Be it your favorite sport, an e-sport, or even who can clean up the most cans from a beach, Tournamaker creates tournaments, by anyone, for anyone.

Deadline: 1.5 weeks

Technologies used: JavaScript (Node.js, Express.js, Angular 6), MongoDB, HTML5, CSS

GPortfolio – <https://gportfolio.herokuapp.com>

G Portfolio is a my personal portfolio site which demonstrates some frontend functionality with Angular6. It is the frontend I wish I had during Ironhack! Angular6 allows for smooth page transitions thanks to the client side router.

Completed: 1 week.

Technologies used: Angular6 (Express.js, Node.js), HTML5, CSS3 Animations, SCSS

GIANNINI CHARLES

Professional Experience

IRONHACK, Miami, FL

June 2018 – August 2018

Web Development, Computer Software Engineering

- ♦ JavaScript, Angular 2, Node.js, Express.js, MongoDB, Mongoose, ES6, AJAX, jQuery, TypeScript, HTML5, CSS, Bootstrap, Responsive Design
- ♦ Good development practices: Focus on clean code principles and good design patterns
- ♦ Assisted colleagues by quickly identifying syntax errors and recommending improvements in code structure.

Miami Dade County Public Schools, Homestead, FL

September 2015 – June 2018

Highly Qualified Social Studies Teacher

- ♦ Technologies: Windows 8, Windows 10, Socrative, Promethean Classflow, Plickers,
 - ♦ Served as a highly qualified Social Studies Teacher in a Title 1 School, leveraging experience with Windows 8, 10 UI and web applications to empower student learning via the use of numerous dynamic web apps. Served as a Promethean Classflow Pilot Teacher.
 - ♦ Received rating of “Effective” (IPEGS data) consecutively for all three school years of employment. Frequently provided technical assistance to colleagues and superiors.
-
-

EDUCATION

IRONHACK, Miami, FL

Web Development, Computer Software Engineering

- ♦ JavaScript, Angular 2, Node.js, Express.js, MongoDB, Mongoose, ES6, AJAX, jQuery, TypeScript, Bootstrap, Responsive Design, HTML5, CSS
- ♦ Good development practices: Focus on clean code principles and good design patterns.

LAMBDASCHOOL,

Web Development, Mini Bootcamp

- ♦ JavaScript, ES6, Responsive Design, CSS, HTML

CODECADEMY,

Web Development, Self-Study

- ♦ JavaScript, ES6
